

Asavie Moda lets you set mobile data usage policies for employees, restricting access to websites that use up valuable data and distract them from getting on with their jobs.

Asavie Moda helps you to securely control your mobile data costs and increase mobile worker productivity. A user-friendly portal that puts businesses in control.

➤ Control the volume of data and who has access to it.

➤ Block websites and restrict improper usage

➤ Avoid “bill shock” that comes when data limits are exceeded

RESTRICTION FREE

DATA THRESHOLD e.g. **2GB**

RESTRICTED

FEATURES AND BENEFITS

DATA USAGE POLICIES

Limit Internet access speeds, block websites and set mobile data limits.

SECURITY

Keep devices and data secure with Locate, Lock and Wipe functionality. Block access to the 3.4 billion malicious requests that happen monthly.

CONTROL ACCESS

Permit or deny access to 25 categories of website, covering 900 million domains – deny 'video streaming' services covering the likes of Netflix, LinkedIn, YouTube, etc.

TAMPER-PROOF

Removing the SIM from the device doesn't bypass the controls.

CONTROL ZONES

Set different usage policies for different geographic locations to stop travelling employees clocking up hefty roaming charges.

REAL-TIME ALERTS

Users are automatically informed when restrictions are applied or the device has been cut off from data.

SPEED REDUCTION

Data-heavy multimedia streaming services can be rendered unusable as data usage limits are approached, restricting users to mission critical tasks.

MOBILE APPS

Reduce service-desk calls with apps that give end-users visibility of their data allowances and usage.

REPORTING

Turn real-time visibility of data usage into valuable insights with our powerful reporting capabilities.
