Location: Dublin - City Centre

About Asavie

Asavie is an Equal Opportunity Employer that offers a competitive salary, benefits & the professional advantages of an environment that supports your development & recognizes your achievements. Asavie offers an inclusive environment where employees have the opportunity to succeed and diversity is embraced as a competitive advantage in the marketplace.

The passion that our people bring to their work extends to their private worlds, and Asavie encourages a healthy balance between the two.

Asavie Engineering Department values training and education and is dedicated to providing the tools and training in support of our employee's professional development.

Is this role for you?

As a mobile developer with the Product Development group, you will be tasked with the development of new features and their maintenance for Asavie's catalogue of mobile applications across both iOS and Android. You will have previously made an important contribution to delivering at least one mobile application to the app/play store that was both visually impressive and received favourable reviews. The ideal candidate will have experience developing hybrid cross platform mobile applications using Xamarin and also a keen eye for design when it comes to building UIs that match the native feel of the system.

This is a great opportunity for the right candidate to join Asavie's rapidly expanding engineering team, progress their career, and play a pivotal role in this exciting phase of the company's continuing growth.

Required:

- 1-3 years of commercial experience building mobile applications (Android / iOS)
- The ability to demonstrate and discuss apps you have worked on, if possible providing app/play store links
- Working knowledge of Objective C / Java / C#
- Familiarity with mobile UI design principles and accessibility best practices
- Experience interfacing with JSON/REST server APIs
- Understanding of mobile development tools and the development life cycle
- Passion for building mobile apps
- Team player with excellent written and spoken English communication skills
- Degree in Computer Science or similar

Desirable:

- Experience with Hybrid Mobile Frameworks specifically Xamarin and Xamarin Forms
- Multi-threaded coding experience, along with both asynchronous and synchronous code
- Experience in implementing mobile enterprise business applications with Android SDK / iOS SDK
- Experience with Continuous Integration, automated testing and deployment (e.g. Jenkins/TeamCity)
- Experience of MVVM
- Ability to effectively prioritize workload to meet deadlines and work objective. Uses resources effectively and efficiently.
- Able to organize and self-direct execution of tasks/duties

How to Apply

If you think you have what it takes to really make a contribution in our company, then email your CV and cover letter to careers@asavie.com. We offer higher than average compensation reflecting the calibre of person required.
