

Position: Platform Service Engineer

Role: Permanent Full Time

Location: Dublin City Centre

Salary: Competitive

As a Platform Service Engineer in the Asavie Engineering department you will be working with a focus on the design and deployment of our development, pre-production and production (private and public) cloud-based platform.

The ideal candidate will be experienced in design and implementation at the large enterprise scale. They will be equally at home with installation and customisation of Windows and Linux or BSD and the tools for automation on these platforms.

Reporting to the Engineering Manager, you will have a keen interest in the processes and technologies that enable secure continuous and effective deployment and on-going monitoring and tuning of cloud-hosted servers and services.

Automation is a key part of this role and familiarity with the tools of the software development, deployment and systems administration is a must.

Required:

- 4+ years' experience in one of the following roles along with 2+ years in another:
 - Commercial software development
 - Build and deployment to Private or Public Cloud – IaaS/PaaS
 - Cloud / data centre system or network administration/engineering
- Proven engineering experience in network/systems solutions design and build.
- Strong scripting skills - Powershell / Python / Bash.
- Experience with automated deployment of operating systems / virtual machines.
- Experience with deployment/config. automation tools (e.g. Kickstart/Puppet/Chef/Ansible)
- Good network/system/software engineering skills.
- Excellent communication skills with a proven track record of documentation.
- Strong computer & network security knowledge.
- Degree in Computer Science or similar.

Desirable:

- Previous experience in one of their roles in a Telecoms organisation.
- Deep understanding and familiarity with Virtualization technologies.
- Familiarity with Continuous Integration/Continuous Deployment best practises.
- Good knowledge of network and systems hardware and how it translates in a virtualised environment.

About Asavie

Asavie is the world's leading developer and provider of cloud-delivered, secure connectivity services to mobile Carriers. Asavie's unique Software-as-a-Service (SaaS) connectivity solution delivers seamless connectivity to the Carrier's customer, regardless of network, technology and locations. This market is poised to grow from zero to almost a billion dollars per year in the next 5-10 years. Asavie has developed world-class products over the past few years and has now reached significant sales and strong profitability.

How to Apply

If you think you have what it takes to really make a contribution in our company then email your CV and cover letter to careers@asavie.com. We offer higher than average compensation reflecting the calibre of person required.
