**Responsibility:**

In this position you will be working across multiple departments, with a focus on supporting the ongoing deployment and management of our cloud-based service. The successful candidate will be part of the Services team responsible for maintaining development and deployment on production environments. Responsibilities include:

- Collaborating with Engineering and Operations teams in planning and implementation of our SaaS infrastructure.
- Automation and more automation! Automating Ops and Admin tasks through creation and maintenance of scripts and tools for internal use.
- Develop, maintain and document procedures to support existing/new production environment deployments.
- Implementing systems to automate tasks associated with the latest production releases.
- Working with project teams to design infrastructure based on customer project requirements and needs.
- Building highly scalable and available environment, ensuring capacity and availability for production release.
- Maintaining and enhancing lab environments
- Actively identify areas of improvement and increase automation of processes to improve the availability, performance and user experience of our systems

**Required:**

- BA/BS degree in computer science or related field
- 3+ years commercial software experience
- 2+ years experience with IaaS / PaaS
- Solid background in System administration and Networking (TCP/IP, Routing)
- Strong scripting skills (Powershell/Python/Javascript)
- Experience with deployment/config automation tools (e.g. Puppet/Chef/Ansible)
- Knowledge of SQL and optimisation features such as Elasticsearch is beneficial
- Experience with common monitoring tools such as Nagios and OpenNMS
- Experience with software development lifecycle technologies
- Strong focus on automation, must be prepared to learn new technologies
- Excellent communication skills

**Desirable:**

- Deep understanding and familiarity with Virtualization technologies.
- OpenBSD experience advantageous
- Experience deploying on Azure
- Strong foundation of networking protocols advantageous
- Familiarity with Continuous Integration/Continuous Deployment best practises

### **About Asavie**

Asavie is the world's leading developer and provider of cloud-delivered, secure connectivity services to mobile Carriers. Asavie's unique Software-as-a-Service (SaaS) connectivity solution delivers seamless connectivity to the Carrier's customer, regardless of network, technology and locations. This market is poised to grow from zero to almost a billion dollars per year in the next 5-10 years. Asavie has developed world-class products over the past few years and has now reached significant sales and strong profitability.
