

Securing Mobile Data for the Financial Services Sector

Companies that profit from personal information have an extra responsibility to protect and secure that data. Equifax failed to take basic steps that may have prevented the breach that affected approximately 147 million consumers.

Joe Simons, Chairman Federal Trade Commission, 2019 (1)

Asavie Moda is a network-based service that enables businesses to easily and effectively manage security, productivity and compliance on their mobile devices. Asavie Moda proactively protects employees from exposure to cyber-attacks, such as Phishing attempts, Malware, Spyware and Ransomware, providing the business with peace-of-mind and allowing employees to get on with the job-at-hand.

Compliance

Assist compliance with financial service specific regulations such as GLBA, SOX, and customer privacy legislation GDPR and DPA. Control access to relevant applications; prevent loss of control if device is lost or stolen.

Productivity

Boost employee productivity with simple, yet comprehensive content filtering. Restrict access to distracting non-business content. Easily manage internet access to over a billion websites and apps through 26 top-level and 150+ sub-level categories.

Security

Protect your workforce by blocking costly and damaging malicious attacks at source. Remain ahead of the game with our zero-day defense protection.

BENEFITS

Strengthen your regulatory compliance strategy

Gain valuable data insights with rich reporting. See where, when and how your data is being used

Our Tamper-proof protection for devices prevents any attempt to circumvent company usage policies

Enforce internal usage policy, limit online distractions and boost productivity

Why Asavie Moda?

Asavie Moda plays a key role in enabling compliance with FINRA's cybersecurity rules and policies as well as SEC regulations regarding the protection of customer information against cyber-attacks:

- Full control of data traffic on all SIM-enabled devices means no blind spots in data security.
- Protect against malicious content and prevent data breaches by blocking access to unauthorized apps and websites.
- Device security and Data loss prevention capability means sensitive customer data is secure even if the device is lost or stolen.
