

ASAVIE \ MODA

# Delivering Productivity to the Transportation Sector

*Fleet and heavy vehicle operators need to keep cyber security top-of-mind to ensure that their drivers, vehicles and systems are safe from cyber attacks by securing ELDs, telematics and other in-vehicle software from tampering.*

*Automotive World, 2018 (1)*

Asavie Moda is a network-based mobility service that enables transportation companies and their employees to work efficiently and securely while on the road. Asavie Moda protects data in transit across the network and delivers a secure internet experience to shield employees against malware, phishing and data leakage.

## Compliance

Assist compliance with regulations like HIPAA, GDPR or industry specific regulations such as FMCSA's ELD mandate. Asavie Moda is device and OS agnostic so all SIM-enabled devices are protected.

## Productivity

Ensure that smartphones and Wi-Fi hotspots issued for business purposes are used as intended by applying rules at the individual, group or zone level.

## Security

In-depth, network-layer protection of your devices and data in transit. Prevent costly data breaches by blocking unknown/untrusted or malicious websites.

## BENEFITS

Strengthen your regulatory compliance strategy

Prevent costly data breaches by blocking unknown or malicious websites

In-depth, network-layer protection of your devices and data in transit

Enforce internal usage policy to prevent time wasting

## Why Asavie Moda?

Asavie Moda plays a key role in protecting data in transit and mobile devices whether they are company-issued smartphones or Wi-Fi hotspots connected to ELDs.

- Full control of data traffic on all SIM-enabled devices means no blind spots in data security.
- Protect against malicious content and prevent data breaches by blocking access to unauthorized apps and websites.
- Device security and Data loss prevention capability means sensitive customer data is secure even if the device is lost or stolen.
