

## Mobilize your workers

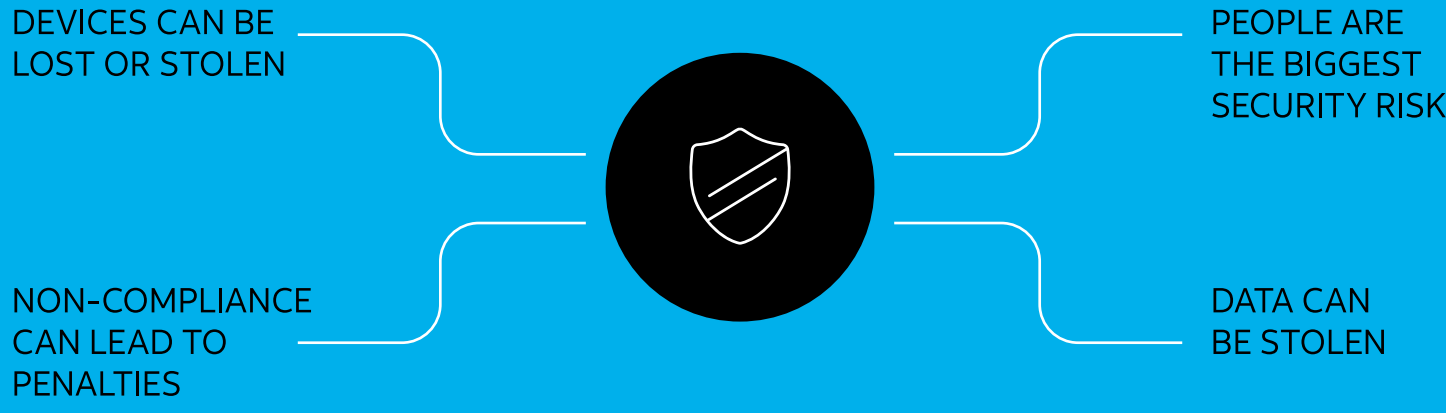

## Improve your business

## Remote workers face security challenges

“ Despite security risks of free public Wi-Fi, 81% still connect to it.<sup>1</sup> ”

OVERALL, MALWARE ACTIVITY INCREASED 61% FROM DECEMBER 2018 TO JANUARY 2019.<sup>2</sup>

“ Some 57% of organizations suspect that their mobile workers have been compromised or caused a mobile security issues in the past year.<sup>3</sup> ”

MOBILE MALWARE | PHISHING ATTACKS | BOTS | MALWARE | RANSOMWARE | SPYWARE

## Mobile data usage is growing

“ Mobile data usage surged 82% in 2018 from 12.89 trillion MBs to 28.58 trillion.<sup>4</sup> ”

“ 44% of IP Traffic by 2023 will be smartphones (26% CAGR).<sup>5</sup> ”

“ In North America, monthly average usage of mobile data is expected to reach 45GB per smartphone by 2025.<sup>6</sup> ”

## Why should your company care?

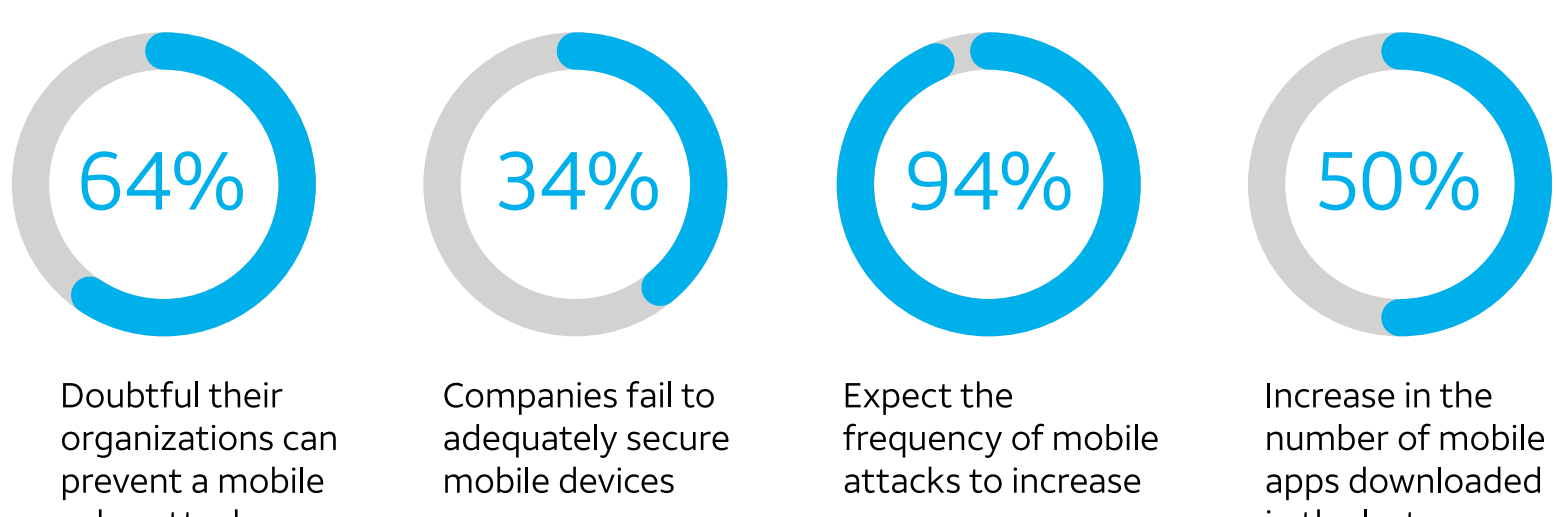

**FINANCIAL COST**  
60% of small business were unable to sustain operations six months after a cyber breach

**REPUTATIONAL RISK**  
Loss of data would not only have legal, but often far worse practical consequences, such as reputational damage with being 'named and shamed'.

## Security professionals are concerned

## Safety checklist

SMART PHONES, TABLETS ARE **EASY TARGETS FOR CYBER-ATTACKS. STAY SAFE!**

- ✓ 1. Password protect all devices and data
- ✓ 2. Locate misplaced devices remotely
- ✓ 3. Lock down all data on lost or stolen devices
- ✓ 4. Wipe devices automatically if unrecovered
- ✓ 5. Block malicious attacks before they happen
- ✓ 6. Comply to regulatory, company & HR policies
- ✓ 7. Control app and website usage
- ✓ 8. Provide insights on inappropriate usage
- ✓ 9. Respond to the observed threats
- ✓ 10. Protect traffic on cellular and wi-fi

## AccessMyLAN™ helps

**PROTECT** company data on the mobile network. AccessMyLAN™ blocks access to the 3.4 billion malicious requests that happen monthly.

**DETECT** suspicious malicious behavior on the device, app and network. AccessMyLAN™ provides observations and actionable insights.
