Office Anywhere SD-WAN Solutions

Augment Enterprise SD-WAN offerings, with secure Office Anywhere networking for mobile connections with no clients

The office and how we work will fundamentally change post COVID-19. The old IT solution of a remote access VPN client per employee and siloed security is both inefficient and costly. Enterprises require a holistic approach to protect mobile employees and to secure access to business applications, that offers the agility to right-size scale with the business needs.

'Office Anywhere' with Nuage SD-WAN 2.0 and Asavie SD Edge

Nuage in partnership with Asavie SD Edge augments the managed service provider SD-WAN 2.0 offering by extending the enterprise SD-WAN to the mobile edge, allowing service providers to offer their enterprise customers self-serve "Office Anywhere" secure connectivity with access to the Enterprise SD-WAN with a corporate mobile connection, that require no clients on the mobile device.

By augmenting Nuage SD-WAN 2.0 with Asavie SD Edge, service providers can deliver competitive advantage to their enterprise customers, by enabling them to evolve with the future of work and deliver to their employees secure and productive work environments wherever they go - at home, on the train, or in a public space. All without the hassle and constraints of additional software or a CPE to plug-in at the remote employee location.

Features

- Works on all standard mobile devices, eliminating the expense and hassle of sourcing fixed access points for enterprise employees.
- Bring corporate mobiles into the SD-WAN securing them from internet threats, wherever the remote employee is working – home, train, conference, etc.
- Simple to roll-out with over-the-air provisioning, quickly connect enterprise employees to office networks, private data centers or cloud applications.
- Enterprise Admin can self-serve private network segments per department, job role or down to an individual employee.
- Enhanced security offering as enterprise mobile connections are off the public internet
- A clientless solution with no security bypass, as the service is tied to the enterprise mobile SIM connection and a private APN.

Challenge

The future office is 'anywhere' employees work and collaborate. Enterprises now require flexible, scalable and cost-effective access solutions to assure business continuity for employees anywhere.

Office Anywhere

With a Smartphone and a Mobile connection, Nuage in partnership with Asavie enables service providers to offer enterprises seamless access to their SD-WAN networks from anywhere, without anything to deploy and manage in the remote location. A Truly 'Office Anywhere' experience for the enterprise as there are No VPN clients or CPEs needed.

Benefits

- Seamless access to Nuage SD-WAN customer's enterprise network using standard mobile connections.
- Unified Protection and Security for employees/devices however they connect (fixed, mobile, IoT).
- No cumbersome devices or clients to deploy at the employee location.
- Hassle free roll out with simple over the air provisioning, minimizing employee involvement in setup.

Securing the Office Anywhere with Nuage SD-WAN 2.0 and Asavie SD Edge

Deliver a secure office anywhere service to enterprise customers, that allows enterprises to self-serve a secure office experience to their employees wherever the employee is situated, using a standard mobile device. Nuage SD-WAN 2.0 with Asavie SD Edge extends the private network to secure and protect all the enterprise's mobile and IoT assets. Facilitate secure connectivity and network access for enterprises, that is hassle free for the enterprise, as they no longer need to manage additional hardware, software or VPN clients per employee or location.

Office Anywhere Use Cases
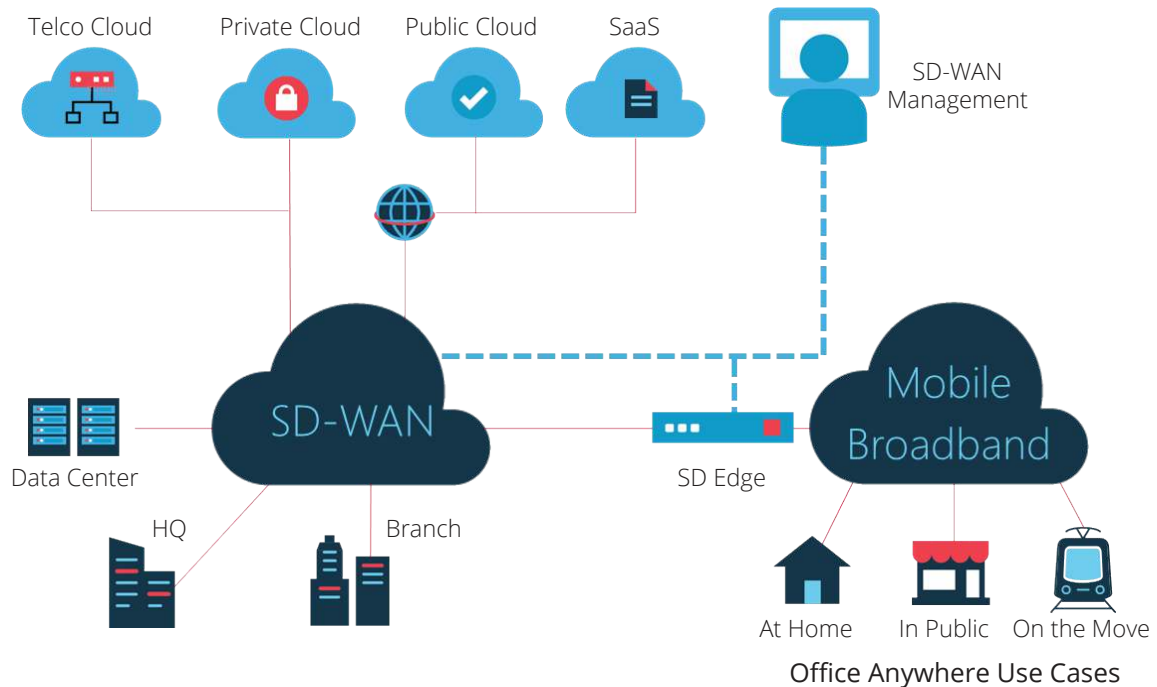

- Security/SD-WAN for all enterprise estate (fixed, mobile, IoT)
- Protection from mobile malware and phishing attacks
- Tailor mobile connectivity experiences per employee
- Visibility and control of all employee traffic

- Secure internet access and usage policies per mobile
- Configurable routing policies for mobile devices
- Supports leading MDM/UEMs for ease of deployment
- Secure remote access to mobile devices

Office Anywhere from Nuage and Asavie

Security for All
Bring mobile & IoT endpoints inside the enterprise private network, for greater control and visibility of work from anywhere employees.

Access Anywhere
CIOs and IT admins can connect to and manage mobile access without the need for cumbersome VPN clients or software on the mobile device.

Productivity Everywhere
Tailor work from anywhere connectivity experiences in alignment with corporate policies, maximizing IT admin and employee productivity.
